dotted with craters and mountains, the maria are relatively flat and smooth and are similar in appearance to deserts, though they are not covered with sand. It is the smooth, flat nature of the maria which makes them of current interest: they are ideal landing areas for future astronauts. The maria are best seen at the time of full Moon, the craters at first or last quarter.

The five maria on the west side of the Moon are all rather small and, with the exception of Mare Crisium, tend to blend together to form one system. Mare Crisium, being separated from the others, is easy to distinguish by eye. The area covered by craters on the west side of the Moon is much larger than the area covered by the maria. On the east side, the area of the maria is greater than that of the craters and mountains. Near the north lunar pole is Mare Imbrium, thought to be the youngest (most recently formed) of the maria and to have been formed by the impact and explosion of an asteroid.

Oceanus Procellarum (Ocean of Storms) is the largest of the maria. It is of special interest because the American Surveyor 1, Russian Luna 9, and several other Russian space craft are sitting near its eastern border. Because of the large flat area available in Oceanus Procellarum we can expect other rockets to be directed toward a landing there. It is hoped that astronauts will be able to explore this region within the next three years.

Vol. 9 - No. 4, Published by the Fed-
eration of Ontario Naturalists, April 1967.

EXTRA SENSORY PERCEPTION

Extra sensory perception is just the fancy name for - telepathy, foreseeing the future, and knowing something before you see it.

The term is used to describe that group of unexplainable happenings, ranging from hunches and premonitions to contacts with the spirit world. This may be a sixth sense.

This sixth sense may be a hangover from when man was more primitive, but all his senses were more sharp than they are now. Because so little is known about this sense many people do not believe in it.

It has been proven that every human being has the ability to see the future, etc., but some people have it more developed than others.

Here is a test to see if your E. S. P. is well developed: it is quite easy to test yourself to see if you have this E. S. P. Any cards that come in packs will do but the standard pack is best. Begin by taking out the four aces and lay them on a table, in a row, face up. Then take the other 48 cards, shuffle them, face down, and do not look at it. Do not look closely at the back of the cards, but focus on the aces. Then lay down the cards, face down, on the ace you think has the same suit. Keep this on till all the cards have been used up. When you are finished see how many "hits" you have gotten. A hit is cards on the right suit. If you go through the deck this way 10 times and keep your score, and get an average of 15 hits per time, you have and should be proud of your E. S. P. ability.

Allen Eaton*

He Has E.S.P. Himself (EXTRA SMELLY PERCEPTION)

F.F. STRIKES
(Again?)

WARNING TO STUDENTS

Beware of teachers: they are on the rampage, with a constant barrage of mind breaking tests. They have no problem making the tests up, but when, it comes time to mark them all we hear are groans and complaints.

Ian Johnston

SPORTS

BOYS

BASEBALL

Boys houseleague baseball has been going strongly now for about two weeks. The first game was the kind that starts the season off in a funny sort of way. The game progressed quickly as the fielders (as they were) kept busy chasing balls here and there. In the first inning team one which was losing as the time got a barrage of hits before the bell rang. Then the anxious players started asking about the score. Everyone's answer was negative for team one. Then it was discovered that no one kept score. Of course this was no one's fault. (Was it Timmy)

It was called a tie but rumour has it that team one won by one point.

VOLLEYBALL

On April 24 the two top volleyball teams the Nats and the Warriors made a trip to Bayshore to play a houseleague tournament. The two teams, hardly given any practise were pitted against Sir Winston Churchill (Warriors) and Bayshore (Nats). Our teams were knocked right off their feet. WE played well but not well enough. WE volleyed well and served beautifully despite the cramped area. But we could not take the ball off the net. This was our downfall because the Bayshore team were experts at this. The games were over in about thirty minutes. Mr. Sherman, volunteering to take some boys home ended up with seventeen boys. He took six boys (flipping coins picked them), six walked, some rode bikes and the rest waited for the other teachers who were coming at five.

Brian Coney

GIRLS

VOLLEYBALL

On Wednesday last week our Sugarbops and Captain Crunches went to Bayshore the Sugarbops played Bayshore and also lost to them on their first game. However the Captain Crunches won against Sir Winston Churchill but lost their second game to Bayshore. Maybe the Grade sevens will do better.

THREE - PITCH

The girls have started five teams and play Monday, Tuesday, and Wednesday mornings. So far :

1 & 2 played	1 won
3 & 4 played	3 won
5 & 1 played	1 won
2 & 3 played	3 won
4 & 5 played	5 won

Also Saturday, May 4, the Greenbank all star team was picked, 6 grade sevens and eight grade eights.

Jane Roberts

SCIENCE

VAMPIRES

Did you know that there really are vampires. Vampires are bats that live on warm blood from living creatures including man. Their teeth are especially adapted for cutting through skin. Their stomachs are modified to digest blood. Vampires eat nothing but blood.

Melichamp de Szara, a Spanish naturalist studied vampires in Paraguay in 1802. Charles Darwin was the first European to discover the bloody habits of the vampire. Long before these men there were tales of blood - sucking vampires. They were said to be corpses that rose from their graves and drank blood to renew their vitality. In obscure corners of the Balkans, a belief in human Vampires still exists. Beware - If you have found any vampires in your classroom notify the Balkins.

The true vampire is a creature of the tropics and makes its home from Mexico to Brazil. It lives on nothing but blood, and man is one of its victims. Its razor - sharp teeth are especially adapted for slicing through blood vessels. The animal is not a danger because of the small amount of blood that it drinks, but because of the germs that it leaves in the wound.

WEATHER

The weather has been beautiful this week, at least for the flowers. (We should be flowers.) All through the week there have been light drizzles. Yesterday we had very light winds with a light drizzle. This continued into the night. Swimming is in season now, however, if you would like to be an invalid just dive into the Ottawa. Over the weekend it will be beautiful weather. On Saturday we had lots of rainfall with lightning and thunder. However on Sunday we had light drizzles.

WANT ADS

- Wanted - Mr. Russell wants a good housekeeper. PLEASE DON'T APPLY.
- Wanted - Mr. Russell wants a hair-cut on his chin.
- Wanted - good report card (John Avery)
- Wanted - Mr. Sherman would like a bigger detention room. Mr. Berry take note.
- Wanted - Mother Guinea Pig is madly in love with Mr. Russell's beard. She likes its red colour.
- Wanted - Young handsome boy to mind my oldest daughter - Karen. Apply Mrs. Thomas 828-4150. Have fun.

LOST AND FOUND

- Lost - Karen Thomas lost her last handsome boy for baby sitting! Would someone please apply 828-4150.
- Lost & Found - Di Richardson lost her code when T. M. cracked it. Because of this she had to find a new one.
- Lost - Karen lost a boy friend a little while ago. Since then Tim M. has tried to move in. Karen is not too happy so will someone please take his place.
- Found - Mrs. Guinea Pig has found Mr. Russell's beard again. She is madly in love!
- Lost - Mr. and Mrs. Reinhardus lost their marriage certificate. They are now looking for another. Mr. Reinhardus has also lost his freedom - when he got hooked.

FUZZLES

While standing on a hard wooden floor how could you drop an egg three feet without breaking the shell? Nothing may be used to cushion the fall.

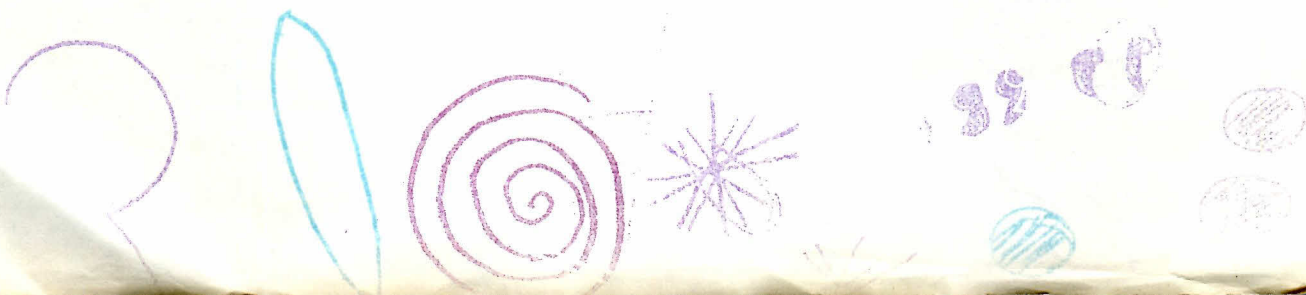

Answer - Drop the egg from a four foot height. It will drop three feet without breaking.

A big Eskimo and a little Eskimo are walking in the snow. The little Eskimo is the big Eskimo's son. The big Eskimo is not the little Eskimo's father. Who is the big Eskimo?

Answer - His mother.

How can you throw a ball with all your might and make it stop and come straight back to you without hitting anything, and without having it attached to anything?

Answer - Through(?) it straight up in the air.

DEAR DEBBIE

1. Dear Debbie,

I still cant spell. I rote in ta yoo and I coult rede a thinge yoo rote. Help. When I rite notes to Kathy Kathie Cathy she cant rede em. What'll i doo!

Cant Spall much Better than Avery

Dear C. S. M. B. T. A.,

Take a 3r&s course. And if that doesn't work, try Di. Richardson's secret code.

2. Dear Debbie,

I have a really buggy problem. There is a rid in my class who constantly bugs me. How can I get rid of this pest?

In Need of a Repellent

Dear I. N. O. A. R.,

Forget your ban. That'll stop 'im. If that doesn't work, try Raid.

3. Dear Debbie,

I have a friend that thinks no one is good enough for him. What should I do?

Confused

Dear Confused,

That's eesy. Reform and become a perfect individual.

4. Dear Debbie,

What should I do? My life is just one big problem. While driving to work yesterday I sideswiped the police cruiser that pulled me over for speeding. Two weeks ago the last of my wives ran away with a gardener's helper. My 31 children are all leaving me. And to top it all off I have this horrible facial hair proble. Please help me.

Sinking Fast

Dear S. F.,

You make a good liar, sir.

DEAR IAN

1. Dear Ian,

The guy next to me has B. O. If I tell him to use ban, he will slug me. Whatshould I do?

Gasmasked

Dear Gasmasked,

That is not bad - the guy in frontof me has bad breath.

2. Dear Ian,

There is this crazy girl next to me with a walk-in-mouth. She keeps yapping all day. What should I do?

Distressed

Dear Distressed,

Most drive ins are fun but I don't know about walk ins.

3. Dear Ian,

I know a tall, skiny boy in portable 2 who tries to shave and his initials are I. J. Everytime he tries, he cuts himself. What can he do?

Signed X

Dear X,

Stop blabbing about it before this handsome, young fellow gets mad.

HORO SCOPES

Aries - March 21 to April 19

Famous Birthdates - Madeline Schwartz

Be careful today; watch out for people trying to make a sale, if you feel sick, stay home.

Taurus - April 20 to May 20

Famous Birthdates - Allan Eaton

You will feel unwanted today. Do not get discouraged, it's not the end of the world (I think!)

Gemini - May 21 to June 20

Famous Anniversaries - Mrs. Fanjoy... er ... a ... Rineheartus

Luck is with you today but don't spoil it by looking into the mirrors.

Cancer - June 21 to July 22

Famous Birthdates - Joe Hero (who's he?)

see Leo

Leo - July 23 to August 22

Famous Birthdates - Hasily Kandinsky

see Cancer

Virgo - August 23 to September 22

Famous Birthdates - Godfrey X. Harrington

Don't give away any thoughts. Otherwise, shut your trap.

Libra - September 23 to October 22

Famous Birthdates - Franz Liszt

You should be cheered by good news received today. Enjoy life.

Scorpio - October 23 to November 21

Famous Birthdates - Bill D. Leaky

Seek help for your troubles. See a head shrinker.

Sagittarius - November 22 to December 21

Famous Birthdates - Nathaniel Bowditch

You should make much progress in your work. Don't give up if something goes wrong.

Capricorn - December 22 to Januaray 19

Famous Birthdates - Chester Bowles

Show your feelings to your loved ones. Not the frog you idiot!

Aquarius - January 20 to February 18

Famous Birthdates - Benjamin Henry Latrole

Don't be harsh on your friends today. Show that you're likeable.

Pisces - February 19 to March 20

Famous Birthdates - Charles Martin Tornov Loeffler

Some important plans will be made today. Think twice about it.

ANNOUNCEMENTS

School's nearly over - control yourself please!

Greenbank girls' baseball team is better than Mr. Hall's
29 -12 ... how's that!

Judy La Marsh hasn't decided whether to go to camp ~~this~~
summer or not, and Bobby Hull still can't roller skate!

Charlie Brown is 28 and he's finally in "LOVE"

THE DAY OF 2 MONTH'S EMANCIPATION FALLS ON THE AFTERNOON OF
JUNE 28TH.

Hurray!

EDITORIALS

THE TEENAGE HOMO SAPIEN

PHYLA - Homo Sapien
SUB PHYLA - Teenage
TYPE - Male & Female - (it)

Before I begin I must admit that I am not a teenager - in fact I am only a lowly 12 year old. However, I feel myself fully qualified for writing this essay because I am surrounded by them. Anyway I am not prejudiced.

The teenage homo sapien comes in assorted sizes, shapes and colours. It can be of uniform type in groups or it can be in a variety pack group or it can be single. This class of vertebrates includes all humans from the ages of 13 to 19. Those older are named adults and those 12 years of age are called teenyboppers (a name which I am sure this class of Homo Sapiens is thoroughly disgusted with).

I am setting out with the purpose of discussing mostly 13 to 14 year old teenagers as these are the ones I am among.

The teenagers' day starts when the alarm rings at 7:00 at which point the creature rolls over and does not resume action until 8:30. A mad rush occurs in the next minutes as the late sleeper makes lunch, eats, dresses, makes beds and does all other jobs which appear worthless and time-wasting.

Arriving at school it races to its classroom and barges in during the Lord's Prayer. After a nasty look from the teacher it beats a hasty retreat outside where it waits quietly until entering.

Even I, feel school is, to say the least, unnecessary. Because it is undesirable, I will refrain from mentioning it but briefly. (Anyway it is so unexciting, I cannot think of anything to say.)

Returning from school the teenager considers the credibility of having 21 snacks between now and midnight. Finally after much deliberation it decides it had better stick to its diet - 19 will do.

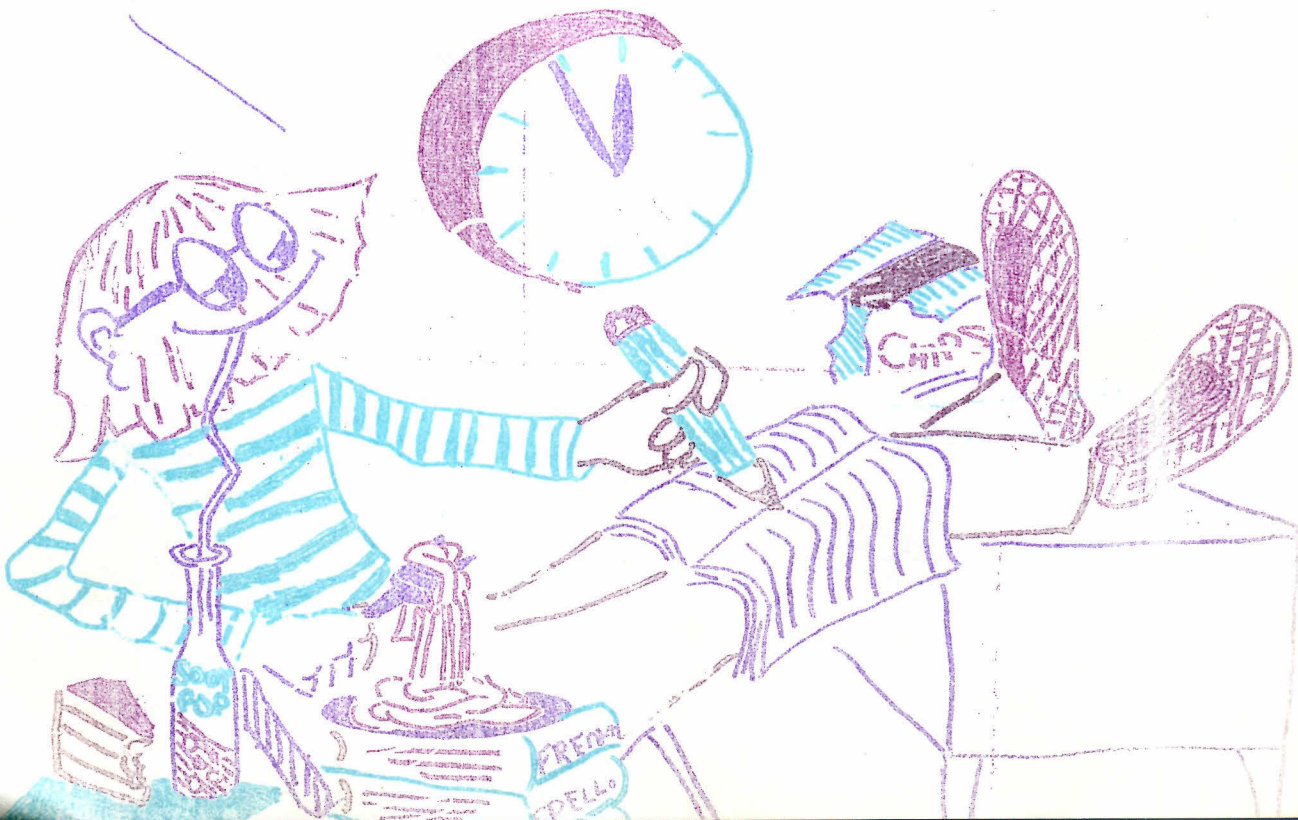

The entire contents of the refrigerator are emptied before it finds a drink. It is a can which is so ancient it doesn't even have a zip open tab. The chips are easily dug out and teenager goes out to consume copious quantities of food and to do his homework.

After the unfortunate discovery that it has 2,719 insect bites, the teenager goes in and finishes his homework.

At 10:30 after the seventeenth snack the homo sapien retires and stops eating - one must not be too indulgent! (Anyway, chips in bed cause crumbs.)

GOOD NIGHT

FLASH FLOOD

TWO MONTH'S RELIEF

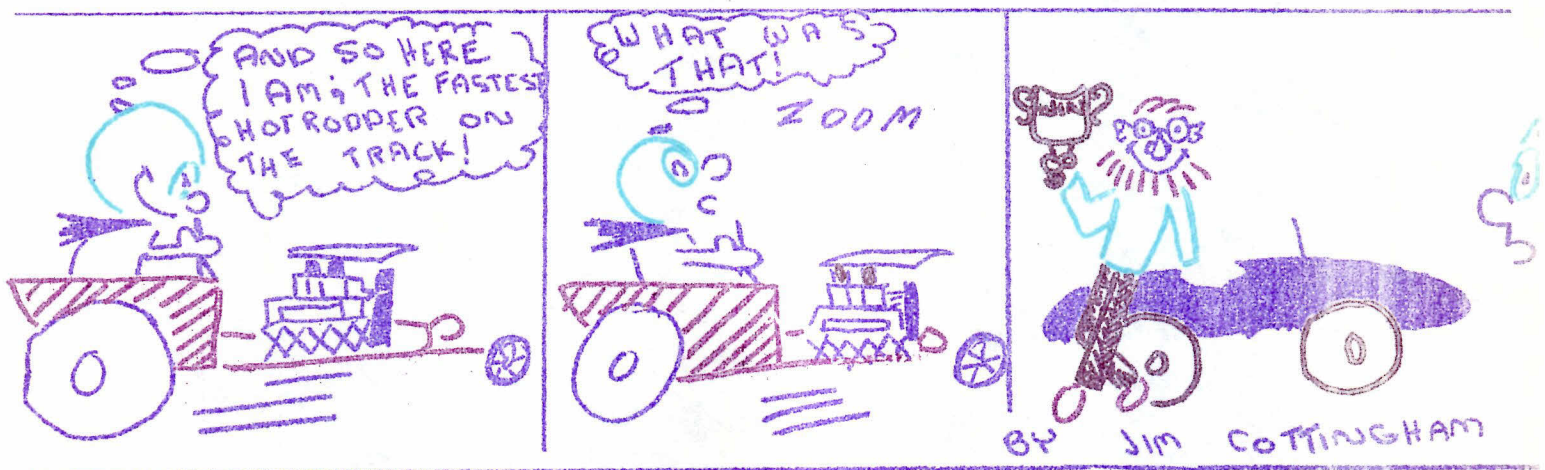

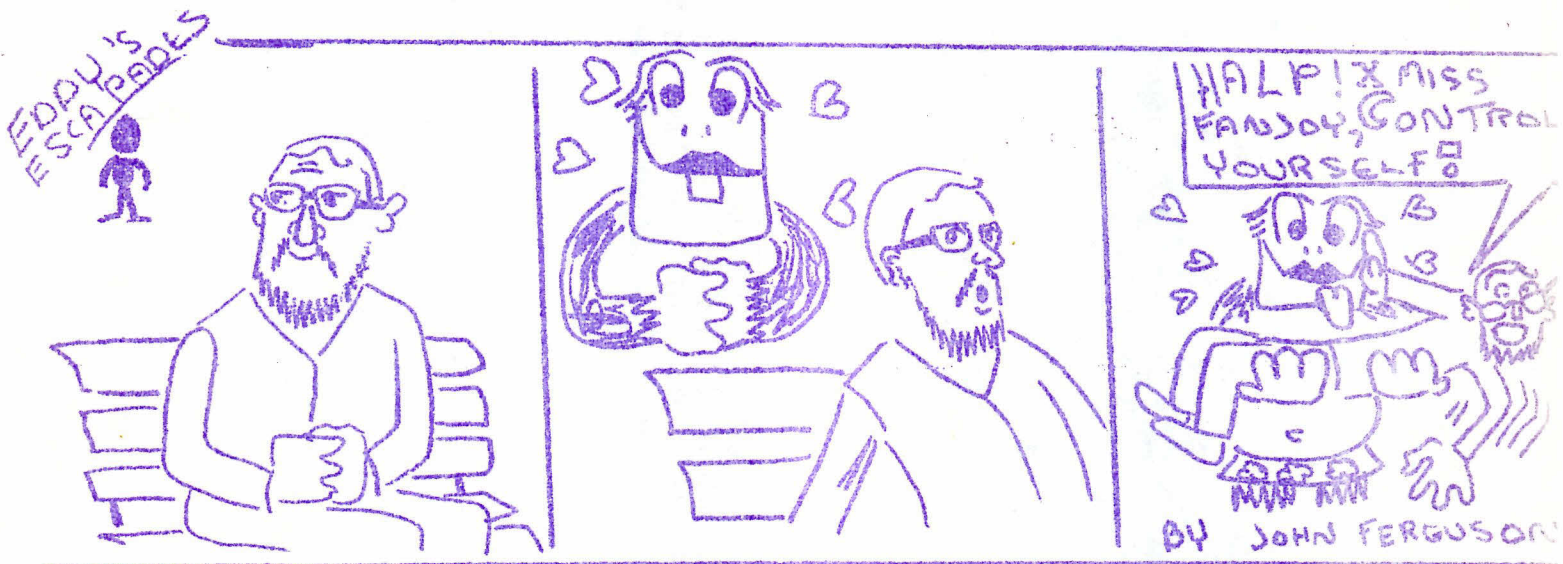

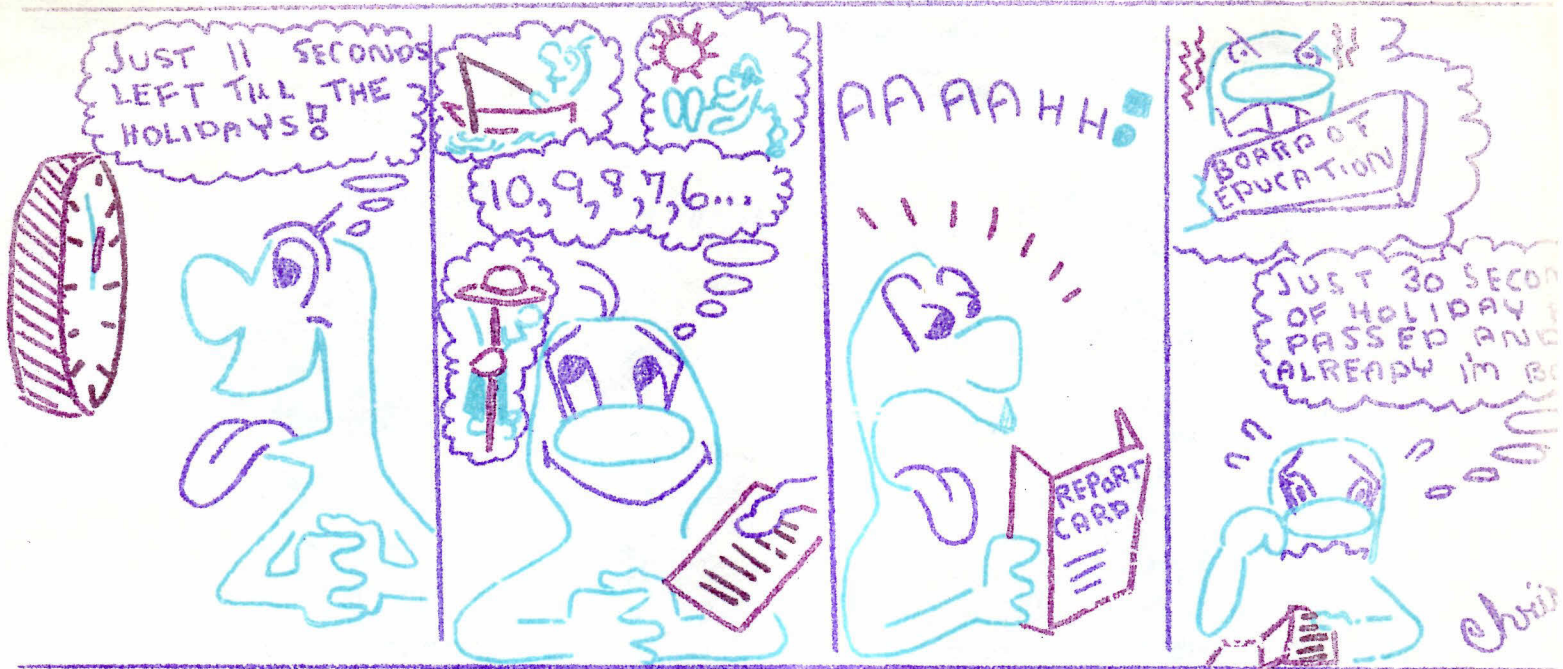

In all the classes of Greenbank, from the dank church basements of Jacquesville to the comparative luxury of our portables a great sigh of relief is heard, and it echoes the feelings of students from coast to coast - "Tests are over, marks are in, school is almost over, and summer's here. Thank heavens it's over!" Soon the notes we, or many of us, have slaved over, can be tossed in the garbage with their worn out corners - their value - nil. Those awful clodhoppers with arch supports your mother made you suffer can be cast aside for the cool barefeet so many are prone to wear on those sizzling days in July.

In the next few weeks there will be many changes for school kids across Canada, but perhaps more so for the grade eights. The changes of spring to summer, work to play, routine to lack-a-days-ness are not the only ones. These are but annual changes, relatively easy, they have occurred several times in our lives and will occur many more times in the future. But now we come upon another milestone in our lives, in the past few months we have been choosing courses and options to last us the next few months - few years - during high school. Having completed grade 8, next year we will be entering grade 9 (simple, eh? $8+1=9$). But the simple mathematics are not all of it, and even Mr. Plant's advanced formulas cannot really fathom the vast distance between the two. For with grade 9, not only will we enter a new phase of education but we will be handed much more responsibilities and will be expected to act with much more maturity.

Many adults we have asked have all said the grade they remember best is grade 8 and for many Greenbank students this will surely apply in future years. This year we have suffered more "bothersome details" than before. Lack of gym facilities, team difficulties, lack of study facilities and supplies and no school, all perhaps due to the inefficiency of the almighty school board. These being just a few, have all impaired our progress. But over this the pupils, with the teachers helping, have triumphed and made it a most memorable year with exhibition games, dances, a playday and to top it off, a victory at the June trackmeet.

For me, this year of grade eight at Greenbank has been a memorabel one. Although I look forward to grade 9 and high school with nothing less than apprehension, I can look back happy and satisfied. Can You?

ON BEHALF OF ALL THOSE WHO KNOW LYNN NASH AND WHO KNOW OF THE UNFORTUNATE INCIDENT WHICH MARRED HER APPRECIATION OF PLAY DAY I SAY THAT WE ARE VERY SORRY AND WE HOPE THAT WE SHALL SEE ^{Her} SOON ROAMING THE STREETS IN IDLENESS HAVING SCHOOL WILL START SOON (Haha...)

RECIPES

COUP SOUP FOR A GROUP

Buy ten cans of chicken soup. First remove the chicken, and then the cream. Remove the labels from the cans and put them in a pot of water. The gluey substance on the back will come off as the water boils. Add the chicken and cream, wover, and cook for five minutes. If you want you can leave the labels in for colouring. Pour the mixture back into the ten cans and use as individual serving cups. Then find ten dumb enough people to try it.

CLUB SANDWICH

Take a large club and put it between two slices of bread. Add mustard and eat. Use the splinters to clean your teeth.
